PROFESSIONAL PROFILE

Flutter Developer with 5 years in cross-platform mobile development, building and maintaining Android and iOS applications. Portfolio of published apps across marketplace, delivery, booking, and service domains, developed from architecture through store submission and post-release maintenance. Strong experience with Flutter/Dart, REST APIs, BLoC/Cubit/Provider, Firebase, responsive UI/UX, Clean Architecture, Git, CI/CD workflows, testing, debugging, and release management.

TECHNICAL SKILLS

Core: Flutter, Dart, OOP, SOLID, Clean Code | **State Management:** BLoC, Cubit, Provider | **Architecture:** Clean Architecture, MVVM, MVC, Dependency Injection | **Networking:** REST APIs, Dio, Retrofit, JSON, Postman, Authentication | **Firebase:** FCM, push notifications, Firebase services | **Storage:** Hive, SQLite, SharedPreferences | **Integrations:** Payments, Google Maps, location services | **Quality:** debugging, performance optimization, unit/widget tests, code reviews | **UI/UX:** Figma, Adobe XD, responsive/adaptive UI, animations, RTL/LTR | **DevOps & Release:** Git, GitHub, CI/CD, Play Store, App Store, build/version management | **Tools:** Android Studio, VS Code, Xcode, Cursor, ChatGPT, Claude

PROFESSIONAL EXPERIENCE

Flutter Developer - Efadah Company for Software

May 2024 - Present

- Build and maintain cross-platform Flutter applications for Android and iOS across marketplace, delivery, booking, event, beauty services, and utility domains.
- Integrate REST APIs and third-party services including payment gateways, Firebase Cloud Messaging, Google Maps, and location services.
- Implement state management using BLoC, Cubit, and Provider and structure features using Clean Architecture, OOP, SOLID, and dependency injection.
- Build responsive, pixel-accurate interfaces from Figma/Adobe XD with Arabic/English RTL/LTR support.
- Maintain code quality through debugging, performance profiling, unit/widget tests, code reviews, and targeted refactoring.
- Collaborate with designers, backend developers, QA, and product managers in Agile workflows.
- Manage Google Play and Apple App Store releases, build/version management, CI/CD integration, and post-release monitoring.

Self-Directed Flutter Development - Personal Projects

2021 - May 2024

- Built 6+ Flutter applications covering authentication, listings, forms, local persistence, state management, responsive layouts, REST APIs, Firebase, and Git.

SELECTED PROJECTS

Offer Deal - Marketplace with Payments & Real-time Chat (Published)

- Developed listings, offers, browsing/filtering, buyer/seller chat, order placement, tracking, and payment integration.

Talabiat - Delivery & Transactions App (Published)

- Built pickup/drop-off locations, driver matching, order status updates, and real-time customer-driver location tracking with Google Maps/GPS.

Qurany - Islamic Utility App (GitHub / Live Demo)

- Built prayer times, Quran reading, Azkar, geolocation, local notifications, and responsive Arabic-first RTL UX.

EDUCATION & LANGUAGES

Bachelor of Computer Science - Mansoura University (2019-2022) • Arabic: Native • English: Professional Working Proficiency
