

# HUSSEIN ABOZINA

## Mobile App Developer | Flutter & Dart | Android & iOS

Egypt • abozina50@gmail.com • +20 102 747 3359 • [github.com/Husseinabozina](https://github.com/Husseinabozina)

### PROFESSIONAL PROFILE

Mobile App Developer with 5 years of hands-on Flutter development, including 2+ years in a professional software-company environment. Built or contributed to 20+ Flutter applications across marketplace, delivery, booking, commerce, finance, healthcare, utilities, and service products. Experienced in end-to-end mobile delivery: UI implementation, REST APIs, state management, Firebase, payments, maps/location, debugging, CI/CD, Google Play/App Store releases, and post-release maintenance. Strong with Flutter/Dart, BLoC/Cubit, Clean Architecture, Arabic/English RTL/LTR, and production-focused problem solving.

### TECHNICAL SKILLS

**Mobile:** Flutter, Dart, Android, iOS, responsive/adaptive UI, animations, Arabic/English RTL/LTR

**Architecture & State:** BLoC, Cubit, Provider, Clean Architecture, OOP, SOLID, dependency injection, MVVM/MVC

**APIs & Data:** REST APIs, Dio, Retrofit, JSON, authentication, Firebase/FCM, Hive, SQLite, SharedPreferences

**Integrations:** Payment gateways, Google Maps, GPS/location services, push notifications, real-time/chat flows

**Quality & Delivery:** Debugging, performance optimization, unit/widget testing, Git/GitHub, CI/CD, Play Store, App Store, version/release management

**Tools:** Android Studio, VS Code, Xcode, Figma, Postman, Cursor, ChatGPT, Claude

### PROFESSIONAL EXPERIENCE

**Flutter Developer — Efadah Company for Software** | May 2024 – Present

- Build and maintain cross-platform Flutter applications for Android and iOS across marketplace, delivery, booking, e-commerce, event, beauty-service, and utility products.
- Integrate REST APIs and third-party services including payment gateways, Firebase Cloud Messaging, Google Maps, GPS/location services, and real-time communication flows.
- Structure features with BLoC/Cubit/Provider, Clean Architecture, OOP, SOLID, and dependency injection while keeping UI and business logic maintainable.
- Own release work across build/version management, signing, Google Play and Apple App Store submission, review fixes, and post-release maintenance.
- Collaborate with designers, backend developers, QA, and product stakeholders to turn requirements into production mobile features.

**Independent & Portfolio Flutter Development** | 2021 – Present

- Build and refine personal/showcase mobile products to deepen product engineering, architecture, visual implementation, testing, CI, release, and AI-assisted development workflows.

### SELECTED PROJECTS

**Offer Deal / Jabha Maak — Marketplace, Payments & Real-Time Chat** | Published

- Implemented listings/offers, browsing and filtering, buyer/seller chat, order flows, tracking, notifications, and payment integration for a production marketplace experience.

**Talabiat — Delivery, Maps & Order Tracking** | Published

- Built pickup/drop-off and order workflows, provider/customer communication, Google Maps/GPS location handling, route tracking, notifications, and delivery-status updates.

**Brees — Personal Finance Flutter Showcase** | Public Engineering Proof

- Implemented a complete 60-state Flutter product flow with Clean Architecture, motion, automated visual QA, CI, and a public live portfolio/APK demonstrating disciplined design-to-code execution.
